

Ever wish you could move, just to be rid of your kitchen?

Consider a less expensive alternative – Kitchen Concepts.

For a fraction of the cost involved with a move, Kitchen Concepts will completely remodel your kitchen – from design, to blueprint, to customized construction, to installation.

If replacing just the cabinets would do the trick, consider refacing. For about half the cost of a kitchen remodeling project (and half the time), Kitchen Concepts can cover all of your existing cabinets so they look brand new and contemporary. For your convenience, we offer a variety of customizable cabinet extras, such as spice rack pullouts, interior rollout shelves, and “Lazy Susans.”

Serving all of Northern California, Kitchen Concepts provides prompt, reliable service to our customers. In February 2008, Kitchen Concepts moved into a warehouse, giving us the ability to now offer a wider variety of stone and synthetic countertops

How much time does it take?

Kitchen Concepts can custom-build a kitchen’s cabinets in one to two weeks – one-third the time required by most kitchen remodeling companies. Refacing projects take even less time – four to six days. All of our cabinets are custom-made.

Getting an estimate

Now available on our Web site (www.kc-refacing.com) is a “Quick Quote” feature. This feature allows you to quickly get an estimate of the cost involved with a remodel or refacing project. Or you can give us a call at (916) 548-3788.
